### Defect

Due to a manufacturing process, the clutch may not fully disengage when the clutch lever is pulled all the way to the handlebar. If this occurs, it could cause a unintended movement of the vehicle.

### Hazard

An unintended movement of the vehicle may increase the risk of an accident, causing serious injuries or death to the rider and/or passenger, or other road users.

### What to do

Owners of affected vehicles can contact their authorised Yamaha Dealer to schedule an appointment to have the motorcycle inspected free of charge.
